

The background of the slide is a wide-angle photograph of a calm sea at sunset. The sun is low on the horizon, creating a golden glow and reflecting on the water. Several yachts of different sizes are scattered across the middle ground, and a large sailboat with dark sails is prominent on the right side. In the distance, a range of mountains is visible under a cloudy sky.

- ✓ The Group's prompt reaction to AMAS market normalization in 2024 in the Composite segment resulted in a gradual adjustments in unit production, which materializes only 8-9 months later. This timing- effect occurs as units already in production cannot be halted, whereas new ones can be easily postponed
- ✓ As a result, the higher availability of finished units for sale in Q4'24 has absorbed NWC, which will lead to a stable NWC in Q1'25 -a quarter that typically sees higher absorption- since units will already be available for sale
