E RIVA FULL ELECTRIC POWERBOAT

The **Riva El-Iseo** is the brand's **first full-electric powerboat** that launches the new **E-Luxury segment**.

An elegant 27-foot runabout, Riva El-Iseo inherits the sleek lines of the Iseo and combines them with a modern, full-electric core. The official version of this model is ready for sale since January 2024.

It has a **Parker GVM310 full-electric** engine from Parker Hannifin, delivering a cruising speed of 25 knots and a self-limited top speed of 40 knots.

El-Iseo has three cruising modes: Adagio, Andante and Allegro.

- Adagio is the ECO mode, designed to optimise cruising performance.
- Andante mode features cruising speed and acceleration comparable to a typical yacht of similar length with an internal combustion engine.
- Allegro is the sport mode, in which the engine is unlimited and El-Iseo can reach a top speed of 40 knots.

E NEW RANGE EXPANSION ANNOUNCEMENT: INFYNITO 80

THE SUSTAINABLE INFYNITO RANGE

Ferretti Yachts extends the brand's INFYNITO range with INFYNITO 80.

Making her debut at Boot Düsseldorf, **INFYNITO 80** joins the brand's hugely successful **INFYNITO 90** (6 units sold) featuring the iconic **All-Season Terrace**.

INFYNITO 80 features the Ferretti Group's F.S.E.A. technology (Ferretti Sustainable Enhanced Architecture), a package of environmentally friendly cruising solutions. They include an integrated system that stores the solar energy collected by the photovoltaic panels installed on the hard top in an Energy Bank.

As for **green materials**, they focus on natural and bamboo fabrics, regenerated leather and recyclable materials, ecological water-based paints and lamellar teak with FSC 5 certification that are used throughout the exteriors.

E NEW INTERNATIONAL CERTIFICATION FOR CRN

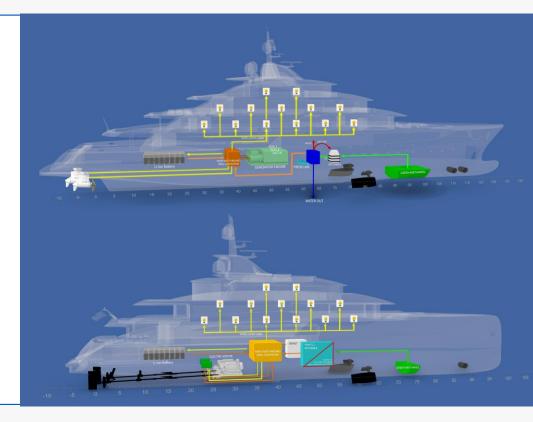

CRN, the Group's historic brand specializing in the design, engineering and construction of superyachts up to 90 metres, obtained a special recognition for the **Sustainable Powered Yacht Project (SUP-Y) by RINA**.

The certification followed the effort for development of two sustainable technical architectures with the most efficient implementation of **Fuel Cell technology** on board a Ferretti Group Super Yacht.

Both the architectures are equipped with Fuel Cells as an alternative power source, fed by hydrogen reformed from green methanol and optimized to ensure several days in full hotel mode without diesel generators running and the capability to sail in zero emission mode for several hours.

RINA confirmed that the project is sized appropriately for proper functioning and easy management and meets the regulatory requirements for safe implementation.

SCUOLA DEI MESTIERI

Scuola dei Mestieri is a Ferretti Group project for 18 to 29-yearolds who want to start a career in the high-end Italian yacht industry.

The program ranges from sessions in the classroom and workshop to on-the-job training in production departments.

After the successful first edition in **Forlì** and subsequent launch at the **Mondolfo** and **Sarnico** sites, the Group kicked off the second edition in November in **Forlì**.

The goal of the second edition was mainly to focus on the newly acquired **Ravenna yard**, aiming to grow the workforce in view of the upcoming full functionality.

S FIRST MASTER'S DEGREE COURSE IN MARINE ENGINEERING PROMOTED BY FERRETTI GROUP AND BOLOGNA UNIVERSITY

With a Memorandum of Understanding signed by Ferretti Group, Emilia Romagna Regional Administration, Bologna University, Cassa dei Risparmi Foundation and Forlì Municipality the new Master's Degree Course in Marine Engineering, based in Forlì, gets under way in academic year 2024-25.

The aim of the course is to enrich university offering with new degree programmes that meet the need set out by industry in general and the yacht building sector in particular on the Adriatic coast where the Group has five production sites.

NET FINANCIAL POSITION & NWC

NALLY

NET FINANCIAL POSITION¹ (€mln) NWC RATIO (%)²

NWC was mainly affected by our own stock of composite yachts ready for sale in the USA, where the season (Oct-Mar) was impacted by the political and economic uncertainties, temporarily delaying the release of capital. However, this also proved advantageous, as the Group had already imported yachts for the 2025 season, avoiding the potential impact of tariffs

- Moreover, the Group experienced seasonal absorption of NWC, in the Composite segment, as finished units for sale must be in place ahead of the European boating season
- Despite these short-term dynamics, we expect a gradual release of working capital over the course of the year
